## About the vaccines

There are currently three Coronavirus (COVID-19) vaccines being rolled out in Scotland.

- Pfizer/BioNTech from 8 December 2020.
- Oxford/AstraZeneca from 4 January 2021.
- Moderna from 7 April 2021.

A 2-dose schedule is advised for the vaccines. For the Pfizer BioNTech vaccine, the second vaccine dose can be offered between 3 to 12 weeks after the first dose. For the AstraZeneca and Moderna vaccine, the second dose can be offered 4 to 12 weeks after the first dose.

The [Coronavirus \(COVID-19\): trends in daily data](#) publication from the Scottish Government includes data on daily vaccinations in Scotland. It provides a breakdown of the number of people who have received their first and second doses of the COVID-19 vaccination in the period from 8 December up to 8:30 am on the date reported. This is based on management information and is subject to change on any given day.

## Total number of vaccinations

This section looks at the total number of vaccinations administered in Scotland. The data for this section comes from the [Coronavirus \(COVID-19\): trends in daily data](#). From Saturday 23rd January, figures have been provided at weekends.

**Vaccination by age group and sex**

This section looks at who has received the first dose of COVID-19 vaccination by age group and sex. COVID-19 vaccines are not routinely recommended for children and young people under 16 years of age, so this age group is not included in the table. The greater number of females vaccinated reflects both there being more females in the older population due to higher life expectancy and a

greater proportion of females in the health and social care workforce.

The data for this section comes from the weekly Public Health Scotland COVID-19 Statistical Report. It provides weekly figures which are based on a reporting week of Monday to Sunday.

Please note that there are currently no details available on the sex of the 288,002 vaccinations that took place in General Practice.

Data is updated daily.
